

I am quite concerned that proceeding 02-278 will undo all the good Indiana's Telephone Privacy law has done. Before the Indiana law was passed, we often let our answering machine screen our calls. This resulted in missing calls from friends and family who thought we were not home. It was just too aggravating to answer those telemarketing calls. Some days we would get 4 or 5! I believe we have only had ONE since getting our phone number on the Indiana list. (It was political. I don't know if that is legal or not.)

PLEASE do not pass any regulation that will water down Indiana's Telephone Privacy law. It has been wonderful for my family. Thank you!
